Welcome to AMX and the Effective Auditorium

The crowd is energetic, the auditorium looks great and you're ready to dazzle them with your multimedia presentation. You approach the podium and acknowledge the crowd - but then you're lost as you discover a bewildering array of buttons and remotes on the podium.

"How do I work this thing?"

AMX's Effective Auditorium solution provides a powerful but easy-to-use presentation platform that eliminates the technology hassle and lets you focus on delivering a knock-out presentation. With AMX and the **Enova DVX All-In-One Presentation Switchers**, each auditorium has state-of-the-art audio and video management capabilities to ensure the best user experience for educational institutions, entertainment venues, corporations, government agencies and other managers of large meeting and presentation facilities. **The Enova DVX**'s All-in-One platform comes in several configurations and sizes (6x2, 6x3 and 10x4) and combines a Controller, Switcher, Scaler, Signal Converter and Amplifier with a professional grade DSP – all in a single box.

THE PERFECT AUDITORIUM
The perfect auditorium begins with efficient behind-the-scenes management of all your audio, video and data sources. The **Enova DVX** seamlessly manages your content so that it can be delivered to any of your displays, screens and speakers - whether on the stage or on the other side of a large hall. And it all happens in real time, without extra programming or configuration.

YOU'RE IN CONTROL
The AMX Auditorium Solution includes **Modero X Series Touch Panels**, environmental sensors and controls that give you absolute command over your auditorium's lighting, screens, blinds and other environmental fixtures – all from the podium or lectern. You can also adjust the volume, choose which source is sent to the projector and select a secondary display. You're always in complete control.

MAXIMUM CLARITY
The Enova DVX includes a built-in amplifier and digital signal processor for configuring room audio for optimal volume and clarity. Additionally our revolutionary **SmartScale®** and **InstaGate Pro™** technologies ensure the best video resolution and hassle-free HDMI/HDCP authentication. There's no easier way to deliver crystal clear video and razor sharp audio configured uniquely to the varying parameters of each auditorium.
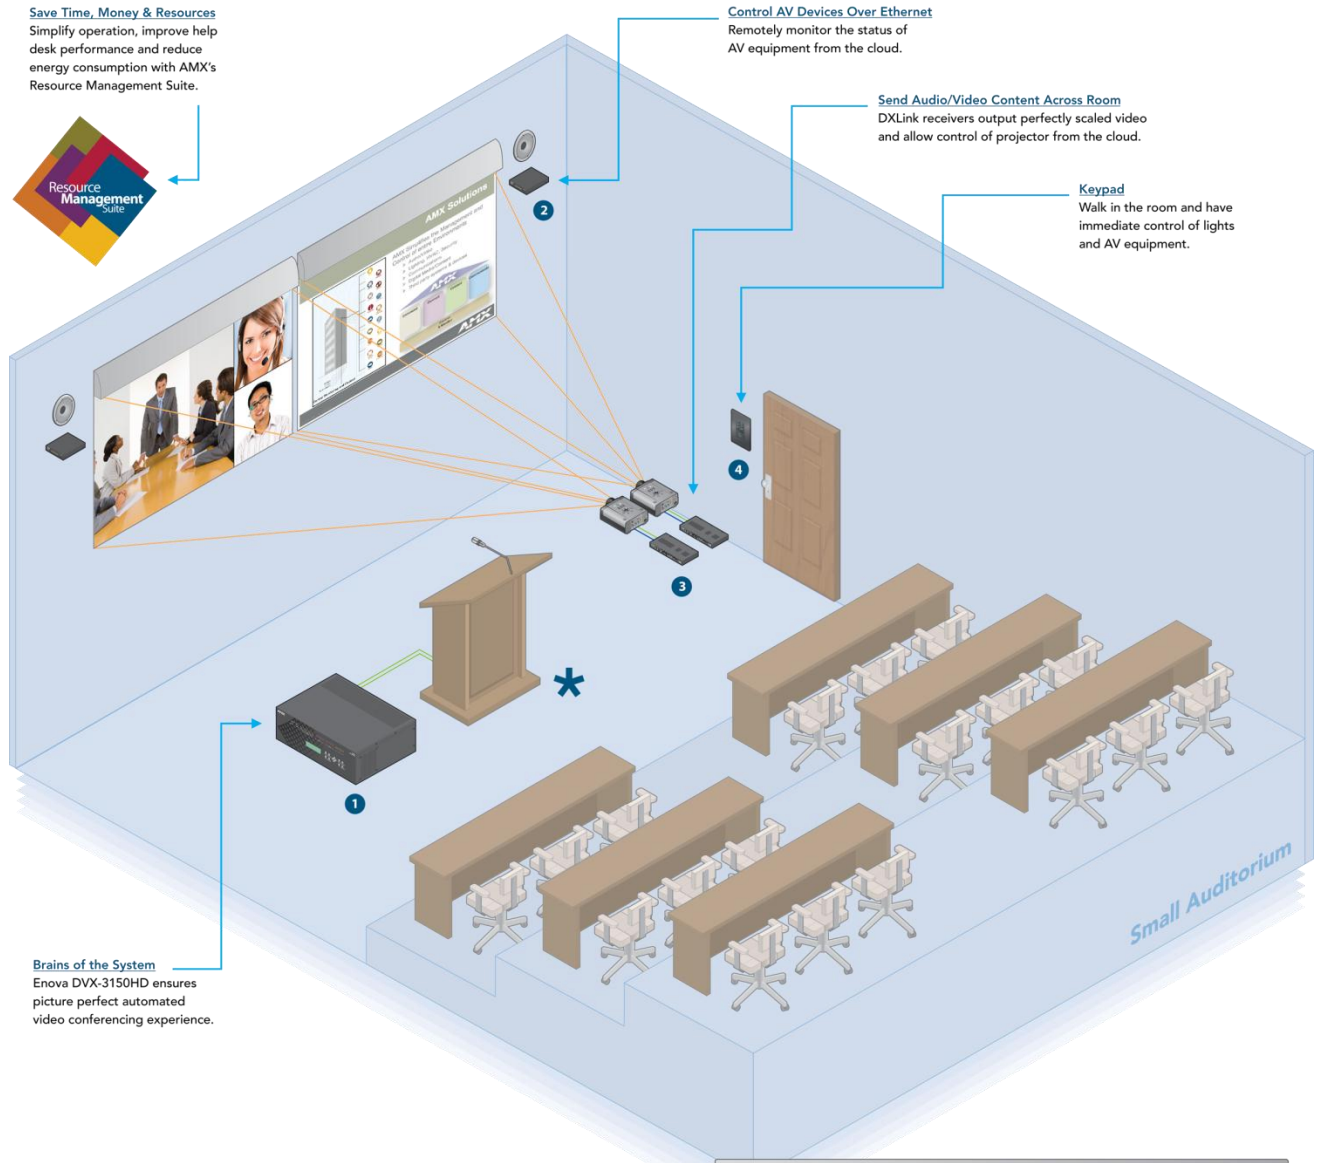

UNITY
The **Enova DVX** Presentation Switcher consolidates several different components into a single 3U chassis, which means the brains of your auditorium can fit in the room itself – even at the base of the podium. That means you can save valuable meeting space and enjoy superior reliability from your AV system.
