Make your Next Meeting the Perfect Meeting with AMX

It's a collaborative world. Studies show that managers spend up to 80% of their time in meetings, while IT professionals spend an average of 40 minutes per day working on conference room productivity and technology issues.

AMX can eliminate up to 90% of all conference room technology problems while dramatically improving productivity. AMX ensures that your conference room technology energizes rather than burdens your meetings. This means you'll spend productive time discussing and viewing information instead of spending valuable time troubleshooting the equipment in the meeting room.

THE PERFECT COLLABORATIVE ENVIRONMENT

The perfect collaborative environment begins with efficient, behind-the-scenes management of all your AV sources. AMX's **Enova DVX-3150HD** All-In-One Presentation Switcher seamlessly manages all your information sources so you can send the information you want to the screens, speakers and laptops you want – whether they're across the table or on the other side of the globe. And it all happens in real time, without extra programming or configuration.

YOU'RE IN CONTROL

The AMX Perfect Meeting Room Solution includes **Modero X Series Touch Panels**, environmental sensors and controls that give you absolute command over your room's lighting, screens, blinds and other environmental fixtures. You can also control the volume, choose which source is sent to the projector, and select a secondary display - all from a single touch panel. And it's the same interface you'll see in meeting rooms throughout your enterprise. You're in control.

REDUCE COSTS

AMX's solution reduces the total cost of meeting room technology ownership by up to 40%. In addition to reducing programming and maintenance costs, the AMX solution reduces energy costs by monitoring the status of devices and shutting them down when they are not in use.
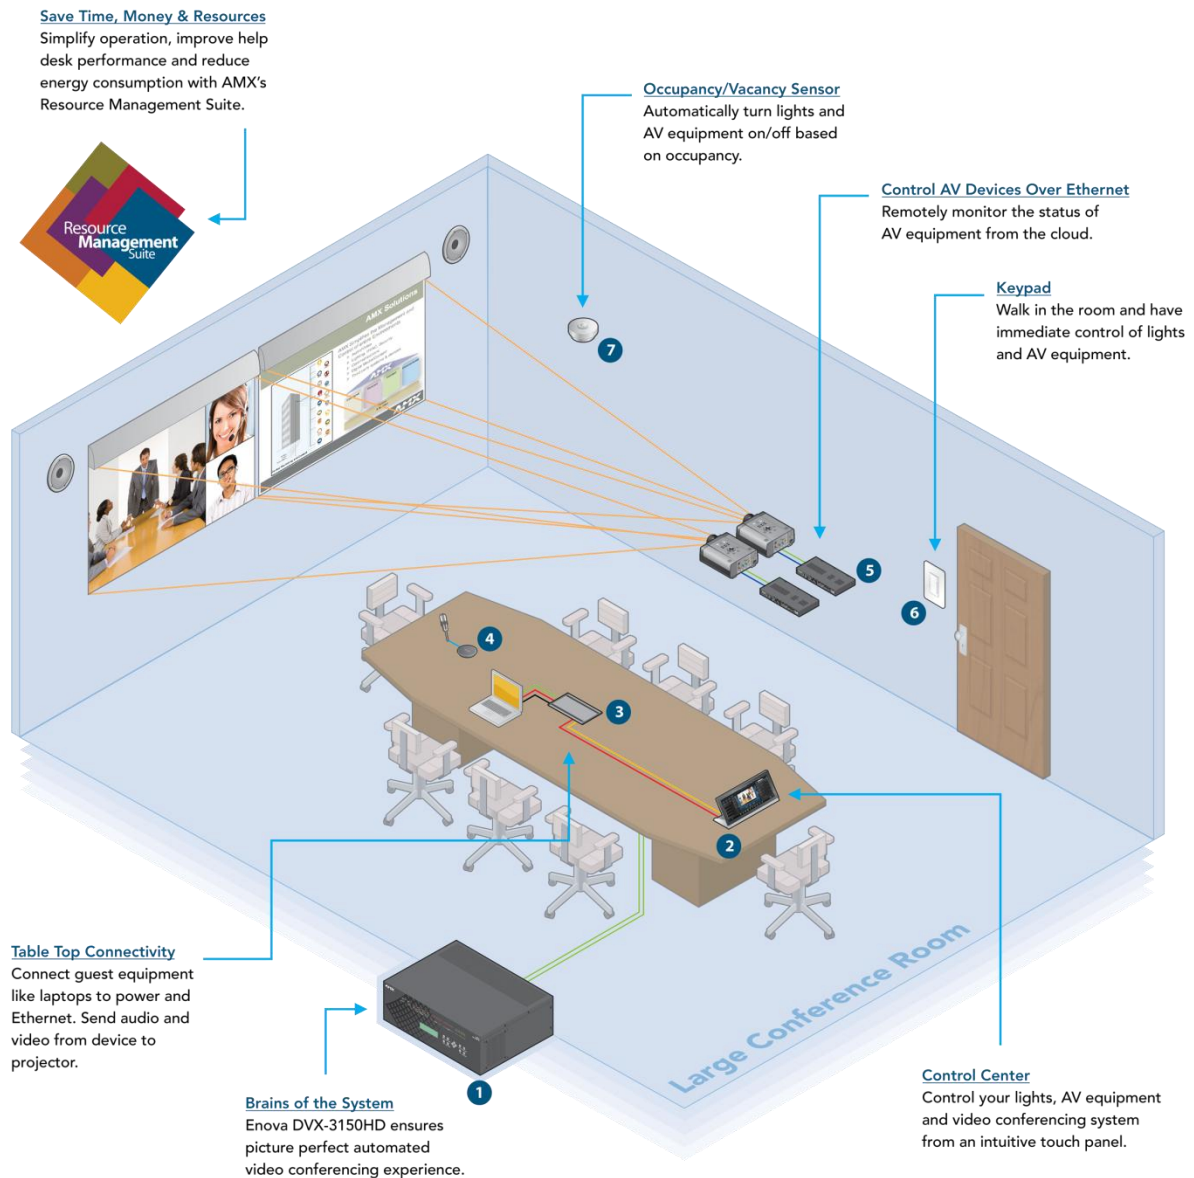

SIMPLIFY SUPPORT

Corporations can significantly reduce their support costs, optimize energy usage and extend the useful life of devices with **AMX's Resource Management Suite**. This software allows support staff to centrally manage and monitor equipment, and to eliminate energy wastage by powering equipment down when not in use.

With AMX as the core of your conference room AV technology, your next meeting is always the perfect meeting.
