

BOSE® SoundTouch™ Module Now Available on the Compass Control®

BOSE® SoundTouch™ products are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use Apple's iOS devices – as its backbone.

Compass Control® now offers integrators a plug-and-play solution with a BOSE® SoundTouch™ module consisting of a bi-directional driver and a pre-configured GUI template. This module will provide customers with access to their music library or their music streaming services all in one elegant interface. Using the Compass Control® app, BOSE® users have access to all the features and incredible sound quality they enjoy from their BOSE® SoundTouch™ devices, while having access to a fully integrated control system with additional video, climate, security, and automation controls. All BOSE® SoundTouch™ products including current Cinemate® and Lifestyle® are compatible with the Compass Control® System.

BOSE® SoundTouch™ Module Features:

- › Select Music from the six programmable presets
- › Now Playing information with album art
- › Browse local music library
- › Audio Controls as well as Bass Control
- › IP Control
