

## The **SCIENCE** of Sunfire

**FFD™ - Frequency Filtration Design** - Every Sunfire engineer knows that the way each individual frequency relates to another has a significant influence on the fidelity - or level of detail of the final performance. Our exclusive FFD Technology is what makes the In Wall 8 Amplifier the perfect soul mate for the In Wall 8 Subwoofer's prodigious bass capabilities. It's a win-win that you'll appreciate and it takes lows to an all-new high.

**StillBass®** - When you eliminate the mechanical vibrations normally inherent with all in-wall subwoofers, you have just one brand remaining: Sunfire. That's because Sunfire invented a piece of technology called StillBass. StillBass cancels, or even eliminates those mechanical noises from Sunfire's In Wall subs so that you're free to turn the sound up and enjoy the incredible bass experience you've always craved. Clean, crisp and accurate bass that will give your music, movies and games a level of detail you won't get in any other product of its kind.

**Smartly Controlled** - Sunfire has created a system where the subwoofer, the amplifier and even the remote control are purpose-built to work together as just that - a system. Each component complements the other to provide what we believe are the best performance characteristics possible. And the best performance is what *you* think it is - not what anyone else does. Which is why the Science of Sunfire lets you dial in the sound that's just right, with simple-to-use functions designed specifically to tailor the bass to your mood today - or anytime down the road.

## It Respects Your Senses and Sensibilities

A 520 Watt vibration-free performance statement designed exclusively for In Wall applications. Wrapped in a cabinet so thin and sophisticated that you can use every one of those Watts with virtually no mechanical vibration whatsoever. And bass performance that can play your movies, music and games with the kind of accurate reproduction that shows no favoritism.

Exclusive FFD™ Technology delivers Sunfire's signature clean, distortion-free bass.

You're reading about the new **Sunfire In Wall 8 Subwoofer System**, a direct descendent of another Sunfire Juggernaut, the renowned 2700 Watt SubRosa - which holds the title of world's most powerful In Wall subwoofer. Period.

What allows the **Sunfire In Wall 8** to rock your world without rocking your drywall and your family's nerves along with it - is an exclusive Sunfire technology called StillBass®. Originally designed for the unbridled power of the SubRosa, StillBass allows Sunfire to pack more power and performance into our In Wall subwoofers than any of those so-called 'competitive' products.

Control all critical adjustments from the convenience of your chair.

And since the bass is what makes the biggest difference in your music, movies and games — we think the In Wall 8 System is a force you'll delight reckoning with.

Powerful. Thoughtful. Formidable. That best describes the new **Sunfire In Wall 8 Subwoofer System**.

And the only way to experience it is at your Sunfire dealer. Visit [sunfire.com](http://sunfire.com) to find the closest one to you.

Sunfire's exclusive High Back EMF drivers make really big sound from really small cabinets.

## What Do You Get When You Infuse Sophistication Into Extreme Performance?

### Anti-Shake StillBass® Technology

Keeps peace in the other areas of the home by constraining the bass sounds to the room in which you place the subwoofer.

### Two Active 8" Sunfire Drivers

Sunfire's reputation for the most accurate bass possible makes movies, music and games sound like you've never heard them before.

### A Frequency Filtration 'Class D' Design Amplifier

Refined over decades of research, this is an amplifier that lets you truly experience The Science of Sunfire. (See back cover.)

### Custom Digital Audio Adjustments

Nobody knows what sounds best to you, other than you. Sunfire's all new In Wall 8 System features Professional-grade adjustments that are perfect for custom installers or audiophiles like yourself.

### 'Credit Card' Sized Remote Control with One-Button, Pre-Programmed Sound Modes

Dial in the perfect sound from the comfort of your chair. With the single push of a button you can switch from movie watching to music listening — automatically.
